

TASK: Setting up a Personal Learning Network

You are going to use some online tools to build your own 'personal learning network'. These tools also enable you to connect to existing networks.

TO DO: Begin to set up a personal learning network...

1. **Register at Google Reader** – www.google.com/reader - preferably using gmail.
 - o **In Google Reader: Add a Subscription**

Cut & paste the following...

- o <http://hcinteractive.blogspot.com/>
 - o <http://angelaathomas.com/>
 - o <http://www.worldchanging.com/>
 - o <http://blog.ted.com/>
2. **Search for Blogs that are in your areas of interest and subscribe to them.** Warning: If you pick blogs that post too often you will get too much to read.

Any web page that has an orange RSS tag will go into Google Reader.
